

KEMENTERIAN PEMBANGUNAN WANITA, KELUARGA DAN MASYARAKAT

MALAYSIAN FAMILY WELL-BEING INDEX (FWBI) 2019 & 2022

Comparison of Overall Scores, Domains and Indicators

OVERALL SCORE

The National Population and Family Development Board (LPPKN) developed the Family Wellbeing Index (FWBI) to measure and monitor the overall wellbeing of Malaysian families. This initiative aims to provide insights into various aspects of family life, such as family relationships, economy, health, safety, community involvement, religious and spiritual practices, housing and the environment. By understanding these factors, the FWBI helps policymakers and stakeholders create family-friendly policies, programs, and services that address challenges and improve the quality of life for families in Malaysia.
